

Dive the Best of Palau

DIVE SITE HIGHLIGHTS

PALAU MAP

CHANDELIER CAVERN

A top dive site in Palau is the one-and-only Chandelier Cavern. This cave system consists of 5 connected chambers, four of which can easily be accessed. The stalactites and stalagmites formations resembling glittering chandeliers give Chandelier Cavern its name. In these caverns, you can even find the elusive Mandarin Fish.

JAKE'S SEAPLANE

Explore alongside Batfish, Lionfish, Big-Eye Trevallies, and schooling Yellowtail Fusiliers. This Japanese Navy Floatplane is fully encrusted with a variety of hard corals, clams, and oysters.

BLUE CORNER

Consistently ranked as the #1 dive site in the world, Blue Corner is breathtaking. The corner is a flat plateau, running a couple of hundred yards out to sea before dropping off abruptly. This site is consistently active with big and little schools of fish. Be on the lookout for marine life like Hammerheads, Bull & Tiger sharks, Whale Sharks, Mantas, and more!

BLUE HOLES

Directly next to the Blue Corner is Blue Holes, a popular entry dive site for newcomers. Featuring four vertical shafts that open to a large cavern, this is the site to see little critters hidden within the holes. Did you know that Blue Holes was formed entirely by freshwater erosion millions of years ago?

GERMAN CHANNEL

Explore the wreckage of a blasted and dredged channel that connected the inner lagoon and ocean to export mined phosphate. Over the years, coral has covered the remains, and the site now features incredible marine life. We often see manta rays feeding on plankton at the mouth of the channel.

NEW DROP OFF

Not for the faint of heart, the New Drop Off is where two reef walls meet to create a dramatic corner with a plateau, before dropping into the abyss. This little corner under the sea is home to schooling Blue Stripe Snappers, Napoleon Wrasse, Barracudas, Spotted Eagle Ray, 6-Banded Angelfish, reef sharks, Green Turtles and so much more!

DIVING & FIREARMS
